

Fact Sheet

Corporate Location: 5520 W. Touhy Avenue
Skokie, IL 60077 USA

Year Founded: 1978

Officer: Gordon Kapes, President

Profile: Designs and manufactures feature-rich, professional audio and broadcast products.

Highly regarded industry-wide for building solid, dependable, easy-to-use products (often referred to by clients as “magic black boxes”), developed for the way professionals work. Also offer outstanding customer support from real live support personnel.

Markets Served: Television and radio stations, stadiums and arenas, recording studios, sports broadcasting, film and production companies.

Products: Products break out into three categories:

Broadcast: Talent cueing systems, field camera interfaces, compact audio mixers for ENG, SNG, and small production vehicles, and on-air announcer’s consoles.

Pro Audio: High-performance analog and digital distribution amplifiers. Detailed test and measurement signal processing for sound pressure levels and temperature/humidity variations.

StudioComm: Stereo and multi-channel monitoring and communications functions. Used for a variety of applications where flexible, dependable monitoring, routing and communication are required. Outstanding audio quality is a key feature in each product.

Distribution: Dealers and authorized resellers across the US and worldwide.
